DEMO FREELANCE SERVICES AGREEMENT

FICTIONAL SAMPLE FOR SOFTWARE TESTING ONLY — NOT A REAL CONTRACT OR LEGAL ADVICE

This document is invented to test PDF text extraction, chunking, embedding generation, MongoDB storage, vector search, and question answering. All parties and business details are fictional.

1. Parties

This agreement is dated 15 September 2026 and is between Northstar Demo Technologies Pvt. Ltd. (the fictional Client) and Kavya Mehta (the fictional Service Provider). The fictional Client address is 22 Example Park, Sample City, India.

2. Services

The Service Provider will design and develop a five-page informational website, including a home page, services page, about page, contact page, and a basic responsive layout. The work does not include payment processing, mobile applications, or ongoing hosting unless separately agreed in writing.

3. Project Fee

The total fixed project fee is INR 60,000 (sixty thousand rupees). The Client will pay 30 percent, equal to INR 18,000, as an initial payment; 40 percent, equal to INR 24,000, after approval of the design; and the remaining 30 percent, equal to INR 18,000, after final delivery.

4. Timeline

The estimated project duration is four weeks from the date the initial payment is received and the Client supplies all required content. Delays in receiving content or feedback may extend the timeline.

5. Revisions

The fee includes up to two reasonable rounds of revisions to the visual design. Additional revisions or new features may require a separate written estimate and additional payment.

6. Client Responsibilities

The Client must provide accurate text, images, brand assets, and timely feedback. The Client is responsible for confirming that it has permission to use materials it supplies.

7. Intellectual Property

After the full project fee is paid, the Service Provider will assign to the Client the rights the Service Provider owns in the final, specifically commissioned website deliverables, subject to any third-party software, fonts, libraries, or assets that remain governed by their own licences.

8. Confidentiality

Each party agrees to use the other party's non-public project information only for carrying out the project and not to disclose it unnecessarily, except where disclosure is required by law or authorised in writing.

9. Cancellation

Either party may request cancellation in writing. The Client must pay for work completed and approved expenses incurred up to the effective cancellation date. Any refund of advance payments will be calculated after accounting for those amounts.

10. Support

The Service Provider will correct reproducible defects in the delivered work reported within 14 calendar days after delivery, provided the defects arise from the agreed scope. New features, third-party outages, and changes made by others are excluded.

11. Disputes

The parties should first attempt to resolve disagreements through good-faith discussion. If that fails, they should seek advice about applicable law and the appropriate dispute-resolution process. This fictional sample does not determine legal rights or jurisdiction.

12. Signatures

Fictional Client Representative: _____
Fictional Service Provider: _____
Date: _____

Suggested test questions: What is the total project fee? How much is the initial payment? How long is the project expected to take? How many revision rounds are included? How long is the defect-support period?
